

ASHOK KUMAR M

Python Full Stack Developer – AI Automation

📍 Chennai 📞 +91 8610345174 ✉ ashokkumar.m0806@gmail.com 📁 Portfolio 🔗 [linkedin.com/in/ashok276](https://www.linkedin.com/in/ashok276) 🐙 Github

Profile Summary

Full Stack Developer with 1.5 years of experience in designing and developing scalable web applications and Generative AI-powered solutions. Proficient in Python (FastAPI, Flask, Django) and modern JavaScript frameworks like React.js and Next.js. Hands-on experience in building RESTful APIs, integrating databases such as PostgreSQL and MongoDB, and implementing AI agents using LangChain, CrewAI, and RAG. Skilled in workflow automation with n8n, cloud deployment, Docker, and working in Agile environments following SDLC, CI/CD, and version control best practices.

Education

Government Arts and Science College

M.Sc Computer Science

2021 – 2023

Kadayanallur

Manonmaniam Sundaranar University Constituent College

B.Sc Computer Science

2018 – 2021

Kadayanallur

Experience

GMIndia Pvt Ltd

Jr. Python Full Stack Developer

April 2024 – Present

Chennai, Tamil Nadu

- Provided 5+ full-stack applications using FastAPI/Flask/Django and React/Next.js, accelerating feature delivery by 30%.
- Led the development of 3 AI agent systems using CrewAI and LangChain, automating 70% of manual query handling and reducing response latency by 60%.
- Architected scalable RAG pipelines with FAISS and ChromaDB, increasing chatbot response accuracy by 95%.
- Optimized 10+ operational workflows with n8n, reducing manual effort in reporting and onboarding by 50%.
- Devised web scraping solutions using Crawl4AI, Playwright, and BeautifulSoup, extracting 100K+ data points from dynamic sources for analytics.
- Authored secure, modular RESTful APIs with OAuth2/JWT, and embedded OpenAI/Clerk services to enhance auth reliability and user interaction.

Kadit Innovations

Python Full Stack Developer Intern

December 2023 – April 2024

Kadayanallur, Tamil Nadu

- Deployed 3+ full-stack web applications using Django with responsive frontends built using HTML, CSS, Bootstrap, and JS.
- Connected PostgreSQL and MySQL to power CRUD dashboards, improving internal data access by 25%.
- Participated in 8 Agile sprint cycles, contributing to 10+ feature releases and collaborating across version control (Git) and testing pipelines.
- Enhanced debugging confidence and reduced reported bugs by 35% through strategic logging and QA feedback loops.

Projects

SkillMatch – Enterprise Resource Matching System | Full Stack Developer

May 2025

- Engineered a scalable full-stack platform with **React, Django, and PostgreSQL** to optimize skill-based project staffing.
- Optimized relational schemas to boost matching accuracy by **30%** and cut allocation delays by **50%**.
- Crafted reusable Tailwind components with mobile-first styling and dark mode compatibility.
- Authored modular APIs for skill-matching logic, talent gap analysis, and team utilization, Boosted staffing alignment by **30%**.
- **Dockerized** backend with CI/CD readiness using environment-based configurations.

MK Sri Builders – Construction Management Platform | Vibe Coding

March 2024

- Delivered a modular construction dashboard using React (frontend) and PHP (backend) powered by **AI-assisted vibe coding** workflows.
- Employed natural language prompts to rapidly generate and iterate UI modules, API endpoints, and DB logic.
- Assembled interactive modules for material tracking, daily updates, and vendor coordination using **Tailwind CSS**.
- Connected a MySQL backend for real-time, role-based project data handling.
- Accelerated release cycles by reducing manual coding through generative prototyping.

GMScan – Document Processing Platform | *Backend Developer*

December 2024

- Built RESTful APIs in FastAPI (Python) for secure document ingestion, metadata parsing, and storage.
- Applied OAuth2 for login with Google, LinkedIn, Facebook, GitHub; made token/session workflows.
- Organized modular routers, async endpoints, and Pydantic schemas to support a clean architecture.
- Enforced robust error handling, validation, and logs, reducing runtime failures by **30%**.
- Collaborated across teams using OpenAPI docs for efficient API consumption and testing.

Agile Delivery AI Agent - Multi-Agent | *Generative AI*

November 2024

- Built a multi-agent CrewAI system to simulate Agile roles (PM, TPM, Designer, Engineer, Tester) for startup project delivery.
- Defined role-specific behavior with advanced prompt engineering, enabling context-aware collaboration.
- Enabled dynamic LLM coordination using **Agent-to-Agent Protocol (A2A)** and **Model Context Protocol (MCP)**.
- Mapped LLMs to roles (e.g., GPT-4 for PM, Claude for docs, Code LLaMA for dev, Gemini for UX) for domain-optimized outputs.
- Automated the full Agile lifecycle from planning to testing reducing MVP cycle time by 60%.

AI-Powered HR Workflow Automation | *n8n*

September 2024

- Automated resume intake from email and web forms using n8n, triggering structured parsing workflows.
- Incorporated an AI parsing agent to extract candidate data and update Google Sheets/Excel in real-time.
- Triggered calendar invites and email notifications to **automate interview scheduling**, reducing manual HR workload by **60%**.
- Simplified interview scheduling via email/calendar triggers, reducing HR workload by 60%.
- Enabled dynamic candidate status tracking with automated notifications to HR stakeholders.
- Organized resume and offer letter archives using Google Drive and Dropbox integration.

Jira Specialist AI Agent – Project Workflow Optimizer | *Generative AI*

June 2024

- Designed an LLM-powered tool **Jira automation agent** that parses project requirements to auto-generate structured Jira issues, including epics, tasks, and sub-tasks with proper hierarchy.
- Integrated **Jira REST APIs** with AI-powered parsing logic to map requirements into ticket templates based on priority, labels, dependencies, and sprints.
- Built a daily **worklog analyzer** that fetches team activity, identifies blockers, and uses LLMs to generate AI-driven suggestions to remove or mitigate those blockers.
- Automated Slack/Email updates with real-time blocker insights using LLMs, reducing average resolution time by 40% in Agile sprints.
- Deployed the agent within an Agile workflow to support **standups**, **retrospectives**, and sprint planning with real-time data from Jira and Git.

Technical Skills

Languages: Python, JavaScript

Frameworks: React.js, Next.js, Bootstrap, Tailwind CSS, FastAPI, Django, Flask

Databases: PostgreSQL, MySQL, MongoDB

Generative AI: Prompt Engineering, LLMs, Natural Language Processing (NLP), Agentic AI, RAG, AI Automation, n8n

Version Control: Git, GitHub

Tools & DevOps: Postman, Docker
