I am a Full-stack Developer with 2 years of experience in designing clean and scalable code architecture across live web applications. Skilled in building AI automation workflows and intelligent agents using modern AI tools and frameworks. Proven ability to integrate end-to-end systems, delivering efficient, real-time solutions with practical business impact.

EXPERIENCE

Junior Full-Stack Developer

March 2024 – Present

GMIndia Pvt Ltd.

Chennai, India

- Engineered full-stack applications using **Python (FastAPI/Flask/Django)** and **React/Next.js**, focusing on scalable backend services and dynamic frontend interfaces with Tailwind CSS and TypeScript.
- Built and deployed **AI-driven agents** using **CrewAI**, **PraisonAI**, and **LangChain**, enabling autonomous task execution, intelligent content generation, and advanced user personalization.
- Developed dynamic, data-driven web applications with the MERN stack (MongoDB, Express.js, React.js, Node.js), implementing dashboard interfaces, secure authentication, and CRUD operations.
- Enhanced asynchronous and modular **RESTful APIs** with **Flask** and **FastAPI**, using JWT/OAuth2 for secure access, and incorporated third-party services (e.g., Stripe).

Full-Stack Trainee

Feb 2024 – March 2024

GMIndia Pvt Ltd.

Chennai, India

- Expanded full-stack web applications using both the **MERN stack (MongoDB, Express.js, React, Node.js)** and **Python (Django) with React**, focusing on scalable architectures, secure authentication (JWT, middleware), and role-based access control to ensure robust, maintainable, and secure systems.
- Built internal automation tools and scripts to streamline repetitive development workflows, boosting team efficiency.
- Worked on AI-driven features using CrewAI, blending intelligent agents to enhance user interactivity and automate key business processes.
- Planned and deployed modular microservices tailored for rapid development and deployment, optimizing code reusability and reducing development time significantly.

PROJECTS

GM Play | Multiplayer Quiz & Live Session Platform | Full-Stack Developer | Backend Team Lead

- Developed a scalable, real-time multiplayer quiz and survey platform using **React.js**, **Node.js**, and **WebSocket**, enabling live interactions with minimal latency for thousands of concurrent users.
- Enforced **role-based access control (RBAC)** to manage admin/user roles, permissions, and personalized dashboard views for individual companies.
- Applied **QR code-based session access**, allowing participants to instantly join live events via mobile or web without login friction.
- Engineered a robust **admin panel** with features for creating and managing quizzes and surveys using both a **manual canvas** and an **AI-powered quiz generator**, improving content creation efficiency.
- Mentored and coordinated with a team of developers on scraping best practices, data privacy compliance, and frontend code quality.
- Integrated a real-time **leaderboard** system with detailed performance tracking and session analytics, enabling hosts to visualize participant scores, responses, and engagement through interactive dashboards for data-driven insights and refined session outcomes.
- Employed responsive UI/UX design and Collaborated with cross-functional teams to ensure data security, session isolation, and role-based access control for admins, hosts, and participants.

Review360 | Python Full Stack Developer

- Developed a **full-stack Review 360** platform using **React and Django REST Framework** with secure role-based access for Admin and Teacher roles.
- Built an Admin dashboard with full CRUD features for managing schools, classes, subjects, topics, teachers, and assigning subjects to specific teachers.
- Implemented student management with both bulk import (Excel/JSON) and single-student creation for efficient onboarding.
- Created a dynamic Teacher dashboard that displays only the assigned classes and subjects, ensuring strict permission-based visibility.
- Designed a student evaluation module where teachers assess performance per topic using standardized rating levels, along with meeting scheduling for individual students.
- Enabled Admins to assign follow-up teachers who can perform evaluations when the main teacher is unavailable.
- Developed an Admin analytics dashboard to monitor performance trends, and integrated multilingual support (**English/French**) with seamless language switching.

AI Agent Ecosystem Development with CrewAI | AI Agent Developer

- Built a **Code Generation Agent** that transformed user input and project requirements into full project scaffolding and production-ready WordPress theme code, streamlining initial setup for developers.
- Built a **Multilingual Media Extraction Agent** that transcribed and extracted text from audio/video URLs in multiple languages, enabling cross-lingual content accessibility and localization workflows.
- Developed **Autonomous agents** for debugging, code optimization, test case generation, and creating end-to-end technical documentation (API docs, architecture, user guides) using LLM feedback loops and prompt engineering.
- Designed a **RAG-based Conversational Agent (Chatbot)** that allows users to upload PDFs and retrieve precise answers from document context using embedding-based retrieval and vector search; integrated long-term memory and deployed a user-friendly interface with Streamlit for interactive knowledge querying.

TECHNICAL SKILLS

Languages: Python, JavaScript
Frameworks & Tools: React, Node.js, FastAPI, Django, Tailwind CSS
Databases: MySQL, MongoDB, PostgreSQL
Dev & Testing Tools: Postman, Docker, Git, GitHub, yaml configuration, CI/CD
AI Tools: CrewAI, PraiseAI

EDUCATION

Misrimal Navajee Munoth Jain Engineering College	Chennai, TN, India
B.E. in Computer Science and Engineering	2019 – 2023
CGPA : 8.4	

Workshops & Courses

- Attended a hands-on **AI in Bioinformatics Workshop**, gaining practical experience in applying machine learning techniques to genomic data analysis, protein structure prediction, and biological data interpretation.
- Completed a **Python Full Stack Development** course at **Besant Technologies**, covering frontend, backend, and database integration with hands-on projects.
